### Introducing the STC 31 NRC 1.00 Silent Protector™ Absorbent Wall

ArtUSA is proud to announce the addition of the Silent Protector™ noise absorbing wall to our product line up. Building on our robust Tongue & groove, easy to install system. The Silent Protector™ noise absorbing wall offers an attractive, cost effective noise wall option for applications where a reflective wall is not ideal.

#### Commercial Applications

HVAC Units

Pumping Stations

Transformers

Generators

Oil & Gas Drilling

Indoor/Outdoor Industrial

Machinery

Outdoor Music Venues

#### Residential Applications

Air Conditioners

Pool Pumps

Standby Generators

Designed in response to an industry need for an absorptive noise wall that was high performing , structurally strong, maintenance free and cost effective. The Silent Protector™ has an STC (Sound Transmission Class) rating of 31 with an NRC ( Noise Reduction Coefficient ) rating of 1.0, can be installed to heights of 30' and spans of up to 10' and is a comparibly lower in cost than other similar products.

Perfect for the nuisance noises produced by pool pumps, generators and air conditioners around the home. The Silent Protector™ can be fabricated into U or L shaped enclosures to remove the maximum amount of noise.

Industrial loading docks, HVAC units, blowers, exhaust fans & any large equipment that businesses need to perform essential tasks within their organizations can also upset abutting neighbors. A sound absorbing noise wall like the Silent Protector™ can reduce the noise to acceptable levels. Construction noise? Need a temporary wall?
